

THE SHOWER TOILET

Transform  
everyday bathroom rituals

# LIVE WELL

In a world overflowing with information, we seek moments of serenity—a chance to disconnect from our daily lives and remind ourselves of who we are. To achieve harmony of the body and mind and restore our vitality.

INAX enables everyone to live this life, elevating your home's most private space into a calming environment that embraces you in water, bringing you comfort and energizing you for what lies ahead.

Discovering the joy of reconnecting with yourself will transform your everyday life.

# INAX

## CLEANLINESS THAT REFRESHES AND REJUVENATES

Since introducing the household shower toilet to Japan in 1967, INAX has continued reimagining the bathroom experience—and our own lives—by refining its human-centric technologies and designs.

Functionality for INAX is not simply about washing away stains but about providing cleanliness that refreshes both body and mind and rejuvenates us.

As you will begin to see, every feature is meticulously designed to navigate you towards a deeper sense of relaxation.

## EASY-CLEAN NOZZLE

Peace of mind,  
born from  
thoughtful design

When caring for the most delicate parts of our bodies, we seek complete peace of mind and a serene sense of comfort. We want to feel refreshed afterwards, ready to head out into the world with confidence.

INAX satisfies this need with a dual nozzle system that thoughtfully dedicates separate nozzles for rear and feminine washing. Tucked away during rear cleansing so it remains pristine, the feminine nozzle offers a gentle wash that will fill your body and mind with a sense of well-being.

This feeling is maintained through some sophisticated features that enhance everyday hygiene. A nozzle sanitizer employs silver ions to prevent bacterial growth, while easily replaceable nozzle tips allow you to maintain an uncompromising standard of cleanliness.

Provide your bathroom with technologies that cater to you and your hygiene, and you'll create a space where you can always find peace of mind.

Every nozzle feature is the product of precision engineering and a legacy of thoughtful innovation.

### DUAL NOZZLE

For over 35 years, we have dedicated separate nozzles for rear and feminine washing, ensuring absolute cleanliness and peace of mind for every user.

### FEMININE MILD

Air is infused into water to create a soft, foam-based spray designed specifically for cleansing the most delicate parts of your body.

### EXCHANGEABLE NOZZLE TIPS

The nozzle tips are designed to be easily removed and replaced, allowing you to sustain an uncompromising standard of hygiene year after year.

### SELF CLEAN NOZZLE

The nozzles automatically rinse themselves thoroughly with running water before and after every use, preserving pristine conditions without any extra effort on your part.

### NOZZLE SANITIZER\*

Everyday hygiene is enhanced with a sanitizer that cleanses the nozzles after every use with water containing silver ions, which prevent bacterial growth.

\* Not available for certain models.

# AQUA CERAMIC

## Enduring purity that is effortless to maintain

Whiteness that remains pristine with daily use not only imbues a toilet bowl with a refined aesthetic, but also enables you to live in true comfort.

Smooth surfaces that continuously gleam free you from tedious cleaning and worries about unsightly hard water spots. Such enduring purity allows you to spend more time with your family and confidently welcome guests at a moment's notice.

Aqua Ceramic is crafted with technology that ensures even stubborn stains can be washed away with a single flush<sup>1</sup>, while its smooth, stain-repellent surface prevents the buildup of

unsightly water spots<sup>2</sup>. The highly durable material resists scratches and also inhibits bacterial growth and odors. As a result, the bowl stays fresh and gleams like new after cleaning—and has been tested to continue to do so for a century.

<sup>1</sup>: Some tough stains will not wash away easily.  
<sup>2</sup>: In case of hard water buildup, scrub with a melamine sponge soaked in water.

INAX promises 100 years of clean<sup>3</sup> – the result of groundbreaking material science and a commitment to enduring hygiene.

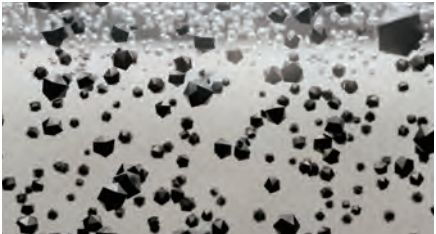

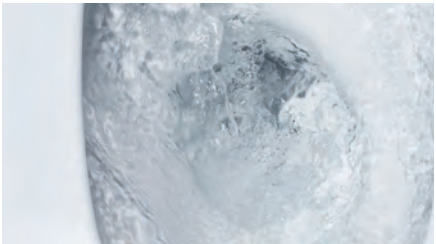

**Super-Hydrophilic (Water-attracting) Technology**  
Aqua Ceramic is engineered with a cutting-edge super-hydrophilic surface. With every flush, water spreads across the bowl like a thin membrane, sliding underneath stains to lift them off the surface. This allows you to maintain a pristine bowl with every flush.

**High Scratch Hardness**  
Aqua Ceramic is fortified with zirconium, a very hard metal that is infused into the material even in the surface of the glaze. This protects the bowl from scratches that can fill with difficult-to-remove dirt, allowing it to maintain its beauty.

**Advanced Antibacterial Protection (SIAA Certified)**  
For even greater cleanliness, Aqua Ceramic employs silver ions to inhibit the growth of bacteria that cause unsightly black water stains and unpleasant odors. Certified with the SIAA (KOHKIN) mark, our technology meets rigorous ISO22196 international standards for antibacterial activity and quality management, providing a level of hygiene you can trust.

**Hard Water Build-up Prevention**  
Unlike conventional ceramic products, Aqua Ceramic features a unique molecular structure that stops hydroxyl compounds from rising to the surface and bonding with minerals in the water, which is the primary cause of hard water spots and silica scales. The result is a surface that remains smooth, shiny, and remarkably easy to clean for years and years.

<sup>3</sup>: Based on abrasion tests conducted with a toilet brush. Results indicate no reduction in quality after being brushed 500,000 times, equivalent to over 100 years of brushing (assuming the same area is worked on twice per cleaning session 365 days a year).

## PLASMACLUSTER

# Ensuring restfulness by eliminating odors and bacteria

Feeling restful in your home begins with a space of absolute purity.

INAX's shower toilet delivers this deep sense of comfort by removing odors and bacteria from the toilet bowl. Even hard-to-reach areas are kept meticulously clean, transforming the bathroom from a place of necessity into a sanctuary where you can truly unwind and refresh.

Revitalized by this experience, you spread your energy throughout the rest of your home, creating a comfortable and inviting atmosphere for family and guests alike.

Enabling this sense of well-being are the Plasmacluster ions that disinfect airborne bacteria on the surface of the bowl to prevent odors. They reach every part of the bowl and the space around it, ensuring the air remains fresh and pleasant to breathe.

A proactive purification process cleanses even the parts of the toilet you cannot see to create a pleasurable atmosphere.

### Comprehensive Surface Disinfection

Plasmacluster technology releases a high concentration of positive and negative ions that travel all around the bowl, surrounding and neutralizing bacteria on contact. From the underside of the seat and lid to the surface of the nozzle shutters, the bowl area remains as hygienic as it looks.

### Active Odor Elimination

Plasmacluster ions also target and eliminate odor-producing airborne bacteria inside and outside the bowl at the molecular level, keeping the air around the toilet fresh and pleasant to breathe.

"Plasmacluster" and "Device of a cluster of grapes" are trademarks of Sharp Corporation.

# Letting you be yourself with usability that feels completely intuitive

Embracing you gently the moment you come into contact with it, INAX's shower toilet offers a comfortable fit that allows you to unwind, transforming the bathroom into a serene space where you can sit and relax for as long as you want.

Hospitality infuses every part of the meticulously calculated design, from the lid that opens automatically when you approach the toilet in consideration of your hygiene to the accessible button layout that can be intuitively operated even at night or by the visually impaired.

Human-centric technologies have shaped the overall form so it reduces pressure on the thighs, allowing you to sit for a while without experiencing discomfort.

Free yourself from stress, and you'll experience everyday comfort that truly enriches your soul.

## Seating that provides a natural fit

With every inch of its shape calculated based on studying the human form, the seat will fit you so naturally you won't even notice yourself relaxing as everyday tensions release from your body and mind. Simply sitting down will make you feel good, enriching your life and filling you with inner peace.

## Controls that feel good to operate

One of life's joys is when everything goes right, a moment that immediately relieves you of stress. The remote provides these moments every time you visit the bathroom, with buttons that are intuitive, their positions determined from extensive user research. Whether using the shower toilet for the first time or the hundredth time, you'll be able to smoothly operate it without even thinking and leave the bathroom reenergized.

# Reconnecting with yourself in a beautiful space you use every day

Simplicity in design elevates a space, creating scenery that makes you feel refined and serene instead of overwhelming your senses.

INAX's shower toilet beautifully blends into its environment like a piece of furniture, conscious of the architectural space in which it is placed while also demonstrating sensitivity toward human interaction.

The moment you open the bathroom door, you feel the tension inside your body releasing as

you take in the elegance of the sight—a side view freed from visual clutter and an intuitive, easy-to-use remote with a simple, flat design.

Inspired by the surface tension of water, the bowl features a symmetrical incline that gently repels water, allowing stains to be cleaned with a simple wipe.

When every element is so calming, you will begin to see the toilet as a private sanctuary where you can reconnect with who you really are.

## A design that becomes one with the space

A lid with a subtle curve inspired by the surface tension of water. A remote with a flatness that allows it to blend in with the architecture. Removing visual excess lets the toilet fade into the background so that a sense of cleanliness and elegance pervades. Embraced by this serene environment, you'll feel refreshed and ready to take on the day.

## Placing you in nature's embrace

There is a sense of comfort we can only experience by engaging with nature, such as by breathing in the earthy scent in the air after a rainy day or listening to the soothing sound of trees swaying in the wind.

These encounters reawaken something deep inside us inherited from our ancestors, a reminder that we have always lived among nature and benefited from its blessings.

INAX recreates this experience through the shower toilet. The simplicity of its form allows it to blend into its environment as if it has always been a part of your world, while the organic textures of the materials and warmth of human craft provide a reassuring certainty. Aqua Ceramic allows water to flow and remove dirt as it does in nature; antimicrobial features preserve the quality of the air around the toilet without harming the environment.

A bathroom that feels like you are in nature will provide the deep rejuvenation you seek in your daily life.

True richness comes from enjoying the blessings of nature without burdening the environment. Silver ions are one example. Unlike aggressive disinfectants, silver ions are naturally occurring particles that eliminate bad bacteria without harming benign microorganisms that are beneficial to humans. This is why INAX chose to incorporate them into the shower toilet's features.

Maintaining cleanliness through the power of silver ions allows you to be less dependent on chemicals, spend less time cleaning, and waste less water. INAX's solution is a testament to people's ability to live in harmony with nature.

# Conveying the spirit of Japanese craftsmanship

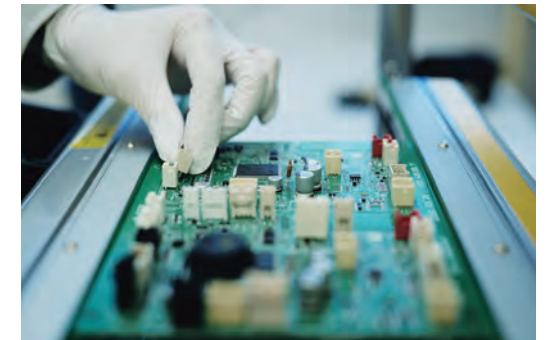

Pristine and uncluttered in both space and ambience, the INAX factory provides the foundation for INAX's pursuit of ceramic products that enrich people's souls.

Every morning, workers arrive to immaculately cleaned floors and neatly arranged tools, aesthetic elements that, in their beauty and refinement, convey respect toward the products that are about to be crafted.

They also communicate a simple desire: that the customer will be able to feel good using the product for as long as possible—a wish that is also ingrained in every factory operation.

Enokido Plant, the main production facility for INAX's sanitary porcelain

Chita Plant, the main production facility for INAX's shower toilets

## Giving shape to the philosophies of INAX

The wish is eventually delivered in the form of human warmth through the sense of comfort maintained by the complex electric systems and the instant peace of mind you feel as you lower yourself onto the perfectly sculpted seat.

Every design is formulated with both people and nature in mind and then given life by equally thoughtful artisans who ensure that every detail is in place.

More than just manufacturers, the workers at the factory are artisans who apply INAX's philosophies to every step of the production process. Even at this very moment, they are giving shape to these unwavering beliefs so they can make a difference for a customer somewhere in the world.

# Building on our heritage to shape the future

When we look back on the history of INAX, we think about our forefathers who shaped clay with the infusion of water and transformed it into pieces of ceramic through the power of fire.

What we have inherited is their craftsmanship—an unmatched mastery in understanding the properties of materials—and their passion for delivering products that make everyday life easier and provide our customers with comfortable environments.

Our origin continues to influence our pursuit today.

When people think of Japanese toilets, they think of shower toilets and the high standard of cleanliness and comfort they afford through their warm water shower spray and dryer functions. Delivering this experience to everyone is what inspired us to launch Japan's very first shower toilet for household use.

Sanitarina 61 was where it all started. Since then, we have continued our passionate pursuit of shower toilets that meet the needs of the body and mind. By constantly testing new colors, forms, and functions, we have been able to provide experiences that have transformed Japan's bathrooms into spaces that offer not only cleanliness, but also comfort and rejuvenation.

We will continue to evolve with the times along with our technologies so we can enrich the lives of customers around the world.

# SATIS G

Luxury that elevates the bathroom into a sanctuary

Navigating you toward a deep sense of serenity and relaxation that makes the bustle of everyday life feel far away, the SATIS G transforms your bathroom into an elegant private room that refreshes your soul.

With its revolutionary features, the SATIS G frees you from worrying about hygiene and sanitation so you can stay in the space in complete bliss.

# SARAS

Timeless elegance and a restorative, serene beauty

Sleek and stylishly simple, the SARAS will fill you with joy the moment you set your eyes on it, transforming your bathroom into a private lounge where you go to restore vitality to your body and mind.

Developed in Japan with an unwavering commitment to quality, each feature will add a touch of elegance to your daily life.

Relaxation, cleanliness, and the richness they bring into your life

Functionality and design continually evolve at INAX in its pursuit of new technologies that will enable everyone to live well—the real richness we seek in life.

Since launching Japan's first shower toilet in 1967, INAX's passion has been to manufacture

creative products that will bring more comfort to your lives, as well as a deep sense of cleanliness.

Just as your lives will continue to evolve, so will the shower toilet. INAX will deliver satisfaction deeper than you can imagine.

# Reconnecting with what it means to live well

In the pottery town of Tokoname, Japan, there is a place that celebrates the area's clay and ceramic culture—the origins of every beautiful product and every refined design in this booklet.

INAX Live Museum provides experiences that will stimulate your senses, fill you with knowledge, and encourage you to create something new with your own hands. Embraced in the gentle light and winds that enter the museum buildings, you may feel something forgotten stirring deep inside of you—a memory that will let you reconnect with who you really are.

Immersing yourself in the artistry that flows through the town will allow you to journey into the very soul of INAX.

## An inspiring journey of sensation and discovery

Upon entering one of the museum buildings, the Toilet Museum, you may notice something about the exhibits—a beautiful simplicity that evokes the warmth of wood and the textures of clay.

Walking through this space will bring you into contact with evidence of a past when people lived in harmony with nature and testaments of how, as foreign technologies arrived on these shores over time, the Japanese imbued them with their own concept of hospitality. Each display is a mirror into the spirit of Japan—just as the Japanese toilet is today.

Reimagining a place of necessity as a space for enjoying a moment of relaxation. Transforming an item of functionality into a beautiful, human-centric work of craft with details you may not even notice. The history of INAX is a history of such innovative thinking—the true value that INAX delivers to the world.

Perhaps this is where it will all begin for you—a journey of discovery into the Japanese spirit and Japanese technology that will move and inspire you.
